GARAGE AREA GLASS CITY 200 TOLEDO SPEEDWAY

Haulers enter the back pit area from behind turn 2. The Credential Office is located at the back pit gate behind turn 2.

The minimum age limit is 13, with signed minor's release on file with the track. Parent(s) must be at the track with child. Child is not to be unattended at any time. **No one under age of 18 permitted down inside track at any time.** For more information contact Toledo Speedway by calling 419-727-1100.

Passenger vehicles may not enter the garage/back pit area or infield.

No Four Wheelers, ATVs, Golf Carts, etc. may be used except to move cars and pit boxes.

No flag poles or antennas permitted in the back pit area.

Pets are not allowed.

Open toed shoes and sandals are not allowed.

Please discard all waste in provided trash cans or, if none are available, please place all waste in closed trash bags.

Pit Road Assignments

11	81 C. Brown
12	22 K. Steckly
13	5 T. McKee
14	24 J. Avedisian
15	96 D. Thorn
16	30 C. Roderick
17	9 D. Kraus
18	14 C. Pinsonneault
19	22 G. Phillips
20	20 K. Kleyn
21	91 T. Majeski
22	32 C. Kvapil
23	19 I. Kitzmiller
24	45 M. Simko
25	4 J. Schroeder
26	33 A. Francis

Pit road assignments are determined by ASA Championship Owner Standings. This is also the race assignment.

TECH & TIRE PROCEDURES

GLASS CITY 200
TOLEDO SPEEDWAY

Technical Inspection

Order of inspection is determined by order of entries with ASA Platinum Program teams placed ahead of standard entries.

Under Car, Under Hood and Safety inspection will take place in the pit stall. Please place car on jackstands with wheels, hood and decklid removed, and driver safety gear available if requested.

Cars failing safety inspection may not take to the track until all infractions are rectified.

All cars are required to go through the inspection line, on Saturday, at the designated time. Technical Inspection stations include but are not limited to templates, referee, and scales.

Weight will be checked with driver sitting in driver seat, steering wheel in place with hands on steering wheel, and helmet on head or in lap.

Cars shall have 30 lbs. of air in the right side and 20 lbs. in the left side tires while in the inspection area.

A maximum of four crew members may be with the car in the inspection area.

Post-Qualifying Inspection Procedure

Cars will be captured on pit road for inspection, during qualifying, at the discretion of series officials. Standard inspection procedures apply. Cars failing inspection will have their lap times disallowed.

General Procedures

It is required that the Crew Chiefs attend the scheduled Crew Chief Meeting [at 9:00 AM]. Please have a team representative draw prior to the Crew Chief Meeting. The draw conducted at the series trailer is the same draw used for tire stacks, ignition boxes, and qualifying order.

All cars are required to use ASA provided ignition boxes. Monetary fine applied to the Car Owner for unreturned boxes. Lead weight must be painted white with car number marked.

Cars must display series windshield and required contingency decals and a transponder is required to be on the car at all times the car is on track.

Cell phones are not allowed in the race car at any time. Violations may result in penalties up to disqualification.

Courtesy Laps: Any team (car) that has been on track and needs to go to a backup car must notify Chief Technical Inspector and upon approval could be given the following options; 1) Will be given safety laps, but must start at the rear of the field, 2) Qualify following normal procedures with no safety laps.

Fuel

This is a 20-gallon minimum Sunoco Race Fuel 110 required purchase event. Fuel shall be purchased before qualifying inspection. The fuel station is located in the outside pit area behind turn three.

Tires

This is a 10-tire maximum race. **The approved tires for competition are Hoosier Racing Tires F-45* left side and ST-3* right sides.**

Qualifying and Race Tires are impounded. Approved tools in the impound area include tire gauge, tire tape, and air hose. Car number decal must be on wheels.

Teams may not scuff race tires in Practice.

Qualifying tires will be impounded until the designated release time [2:30 PM] on Saturday afternoon for Qualifying. Tires must be scanned/stamped prior to leaving the impound area.

Race tires can only be changed during a controlled pit cycle or green flag conditions unless a flat tire is approved by an official. Any attempt to circumvent the tire procedures may result in a two lap per tire penalty.

PRACTICE & QUALIFYING

GLASS CITY 200
TOLEDO SPEEDWAY

Practice Procedures

Car numbers in all locations described in the rulebook, series administered transponder, windshield valance, and contingency decals are required to be installed for Practice.

A spotter is required to be in the spotter stand and monitor race control via scanner during Practice (467.7875).

For this event, teams will unload and work pit road. Cars will use pit road to enter and exit the race track. All adjustments and/or servicing of the race car shall be performed within the team's designated pit box on pit road.

Pit Road Speed is 30 MPH. No scuffing tires on pit road. No ATVs, Golf Cars, Scooters, etc. on pit road when the track is hot.

Practice will remain green for the session. Cars will blend in, at the command of the pit out official (or light) with a maximum of approx. 12 cars on track at a time. If a yellow flag is displayed, all cars are to return to pit lane immediately. Cars that were on track at the time of the caution have priority to return first when practice resumes.

Failure to comply with practice/pit procedures including but not limited to; blend line, speeding on pit road, running the stop sign/light, scuffing tires, etc., may result in penalties including loss of practice time.

Qualifying

For this event, all cars must be staged on pit road by 2:50 PM. Cars not staged by the designated time may be placed under penalty, forfeiting the fastest of their two qualifying lap times.

At 2:50 PM, only the approved qualifying adjustments may be made to the car. The approved Qualifying Adjustments are tape on the grill screen and brake ducts, air pressure, check lug nuts, and driver comfort. Generators may be permitted in the staging lane once all cars have passed inspection and/or permission is given by series officials. Cooldown units are not allowed. Use of such units are subject to severe penalty.

Qualifying will be conducted one car at a time. Each car will receive one warm up lap and two laps on the clock. Cars may only make one qualifying attempt. An attempt is officially made when the car passes the finish line to begin the first lap on the clock.

The order of qualifying is determined by draw. Cars must qualify in the proper order. If a car misses their position, the team will be placed on a 5-minute clock to present the car for qualifying. Once the 5-minutes expires, that car may not qualify.

For this event, cars will be staged at pit out and sent directly onto the race track from there. After the checkered flag, cars return to pit lane for post-qualifying technical inspection and/or impound. Crews may not touch the car until given permission to do so by series officials.

In the event of inclement weather or time delays, series at its discretion may change the format of qualifying to a group qualifying format. If qualifying is canceled, the field will be set by ASA STARS National Tour 2026 Owner Standings. Car Owners that have not earned any points in 2026 will be lined up by order of entry behind those with points.

Post-Qualifying Impound

Cars will be impounded after qualifying. The only adjustments allowed in impound are air pressure, stagger (may be checked with a stagger stick only), check and tighten lug nuts, tape on the nose and brake ducts, and driver comfort. A maximum of four crew members are allowed at the car. Once adjustments are complete, crews must leave car and may not return until given permission to do so by series official.

Teams may not pull cars out of impound or work on race car in impound. Working on, or attempting to work on, an impounded race car constitutes an unapproved adjustment and is subject to penalties. If permitted by the Chief Technical Inspector/Series Director, teams may rectify only the declared mechanical failure(s) and will forfeit their starting position. Any attempts to make additional adjustments to the race car outside of the declared mechanical issue may result in lap penalties.

RACE FORMAT

GLASS CITY 200

TOLEDO SPEEDWAY

Starting Lineup

The starting field is set by qualifying results. Starting positions 1-22 are locked in from Qualifying. Feature starting positions 23 through 26 are determined by the finishing results of the Last Chance Race. Starting positions 27 and 28 will be awarded to the cars highest in ASA STARS National Tour 2026 Owner Championship point standings. Additional starters may be added.

Feature Race

The race is a 200-lap, caution counting, race, except for the final 10 laps of the race. Cars cannot lose a lap during a caution period. The race will be conducted in three stages with the completion of Stage 1 at lap 60 and the completion of Stage 2 at lap 120. The stage may be completed if a caution flag occurs within the final ten laps of the scheduled stage distance (lap 50-59, 110-119). There are no scheduled competition cautions in this race. The race is complete after three overtime finishing procedure attempts.

START	POSSIBLE TO	END STAGE 1	POSSIBLE TO	END STAGE 2	FINISH	
1-49	50-59	60	61-109	110-119	120	121-200
----- CONTROLLED PIT STOP POSSIBLE -----		CONTROLLED	----- CONTROLLED PIT STOP POSSIBLE -----		CONTROLLED	---- CONTROLLED PIT STOP POSSIBLE ----

Pit Cycle

Controlled pit stops will occur every time the caution flag is displayed unless Race Control, at their discretion, calls a 'Quickie Yellow' or no cars come to pit road the first lap pits are opened.

The controlled pit stop cycle is three laps.

When pitting during a controlled pit stop cycle, cars that pitted will return to the track in the same order as they entered the pits, relative to the cars that pitted, and will line up behind the cars that stayed out. Cars returning after the controlled pit cycle is complete (3 laps) will be penalized. To remain in the cycle, cars must beat the pace car off pit road, the third time by. Cars pitting too soon or out of cycle (third time by, or later, after the pits are opened) will also be placed under penalty and restart at the tail of the field, behind all cars that stayed out or pitted correctly.

Pitting Procedure

Cars shall remain single file behind the pace car during the caution. Do not pull up to pit. When pit road is open, remain in line until your car reaches the designated pit entry point.

The pit road speed limit is 30 MPH.

Cars must pit within their designated pit box.

Only traditional tools and procedures may be used during a pit stop. All pit equipment and crew must remain behind the pit wall until your car is in the box. A maximum of five crew members allowed to service the car. No shorts or open toe shoes for over the wall crew members.

Teams may take tires and fuel at the same time. All four tires may be changed. Race tires may be changed during a controlled pit stop or under green flag conditions. Tire changes during a quickie yellow must be approved by a pit road official. Any attempts to circumvent tire procedures may result in a two-lap per tire penalty.

Teams may work on cars on pit road during red flag conditions.

Pit Road infractions including but not limited to speeding, late off pit road, running the stop board, pitting out of the box, too many men over the wall, equipment leaving the box, advancing positions on pit entry, etc. will result in a penalty of restarting at the tail of the field, behind all cars that stayed out or pitted without penalty.

RACE PROCEDURES

Initial Start: Flagman starts the race. No jumping a start or changing lanes before the finish line. If a green flag lap is not completed on the initial start, there will be a complete restart with all cars back in their original starting position except for any cars that are penalized, receive assistance, or cars that pit.

Stages: The race will consist of three stages. The red/white/blue ASA STARS flag will be displayed at lap 60 and 120 signifying the completion of the stage and should be treated accordingly. Caution lights will illuminate when the lap is completed.

Yellow Flag: There will be no racing back to the caution. When the yellow flag is displayed, all cars must slow to a caution pace and bunch up as quickly as safety allows, so safety crews can work on track. All cars must get single file and stay single file. Lineup disputes will be settled by race control. Failure to comply can result in penalties including being placed at the rear of the field and up to disqualification. No tire scuffing around workers on track. **Pace car speed is 35 MPH.**

Cars Involved in the Caution: Only car(s) directly involved in bringing out the caution will go to the tail of the field. Any cars that spin or stop to avoid and were not directly involved with the initial cause of the caution, will get their spots back if they do not receive assistance or go to pit road. Rough driving will not be tolerated. If contact with a car causes a yellow flag and the contact is not a "racing incident," that car will also be sent to the tail. Rough driving can result in penalties including being sent to the tail of the field, pass-through penalty, lap penalties, and/or possible disqualification from the event. Cars deemed intentionally stopping or creating their own caution will receive a two-lap penalty.

Restart: Restarts will always take place in the box coming off turn four. The restarts will be double file and will use the choose rule described below for restart lineup. The leader of the race is the control car and must maintain pace speed. The front row shall be side-by-side. Once the pace car leaves the field, the leader maintains pace/restart speed (50 MPH) until the box. No slowing, weaving, brake checking, increase or decrease in speed once the pace car leaves the field. The leader accelerates first, at their descension, once in the box, before the end of the box. No jumping a start. If a restart violation occurs Race Control reserves the right to call the start back by displaying the yellow flag. The infringing car(s) will be penalized, restarting at the tail of the lead lap. Cars will not re-choose, rather the row will move up. On restarts, cars must stay in their lane and may not pass until the finish line. Changing lanes may result in a pass-through penalty. If a green flag lap is not completed before a yellow comes out all cars should go back to their prior position except for any cars that are penalized, receive assistance, or pit.

Restart Lineup: The field will be realigned according to the last completed lap. The field will be realigned in the following order: lead lap cars, lead lap cars that pitted, lapped cars, lapped cars that pitted, lead lap cars under penalty, lapped cars under penalty, wave around cars, and free pass car. Field will choose at designated point just past the finish line when instructed to by race control. All cars are eligible to choose at the cone. Restarts will be double file. Cars may choose the inside or outside lane as they approach the choose cone. If a car strikes the choose cone, changes lanes after the cone, deemed impeding or otherwise slowing down the choose process, that car must restart at the tail of the longest line. Cars that miss the choose lap will realign at the tail of the longest line. Any disputes in track position will be resolved by a call from race control. Failure to lineup in proper position may result in a pass-through penalty.

Red Flag: All cars must stop as quickly as safely possible when the red flag is displayed. Cars may go to the pits for crews to work on them, only after they have received approval from race control to do so. Cars pitting under red must restart at the tail of the field.

Black Flag: Cars that receive the black flag must go to pit road immediately. If a car does not go to pit road within three laps, that car's scoring will stop until the situation is rectified. Check with the spotter for guidance from race control.

Wave Around: At the end of any caution period, any cars that are at the tail of the lead lap, behind the pace car but in front of the race leader will be "Waved Around" to pass the pace car and return to the tail of the lead lap cars, thus ensuring that the leader of the race will always start the race at the head of the field. Cars using the "Wave Around" cannot pit during that caution period.

Free Pass: At the time the caution comes out, the first car behind the leader one lap down will be deemed to be the Free Pass (if Free Pass is the cause of the yellow then it would go to the next car in line). Free pass will stay in their position (Free Pass may pit if they elect to and still retain the Free Pass), until directed to pass the pace car after the pit cycle is completed. No free pass will be awarded in the last 10 laps of the event.

Slow Cars: Slow cars will be advised in the drivers meeting which lane to utilize in the presence of lead lap cars during the race. Lapped cars that create problems for lead lap cars may be penalized. Lapped cars should let the leaders go by on the preferred lane and then resume racing. Lapped cars that are repeatedly passed without giving the preferred lane during the race may be penalized. Cars fighting to stay on the lead lap are not forced to yield to the leaders until the leader has passed them. Minimum speed is 120% of the fastest lap from Practice.

Spotters: Spotters are required to be in the designated spotters stand for all on track activities. Only one spotter per team is allowed in the spotter stand, no guest. Spotters must have the ability to listen to race control via a standard electronic scanner or dedicated radio at all times. The frequency for this event is ASA 467.7875. If the spotter leaves or is removed from the spotter's stand, the car will be black flagged.

Post-Race: The top five finishers report directly to the victory lane area. Crews may touch the cars only how and when they are directed to by series officials. All cars are subject to be captured by officials for post-race technical inspection.
